

Introduction

Your Smart Phone is Intelligent. Now your accessories can be too.

Thank you for purchasing the Smartcell Replenish/Replenish XT Rechargeable Lithium Ion Battery. Please read this Smart Guide Instructional Booklet carefully before using your battery to educate yourself about your new purchase.

Recycle Batteries

Be smart and keep our planet green: Please recycle your old batteries appropriately. Visit www.call2recycle.org for more information.

Features

The Smartcell Replenish & Replenish XT Batteries are premium, high-performance batteries suited for personal electronic devices such as mobile/smart phones, digital cameras, and personal digital assistants (PDAs).

Utilizing world-class Lithium Ion Cells in its construction, Smartcell Replenish/Replenish XT batteries provide improved run time and better protection of the powered device when compared to economy batteries.

Users of the XT Series will enjoy substantially longer battery life. With its larger, higher-capacity cell and custom-molded, extended back cover, you will have piece of mind knowing your device will be powered for you wherever you go.

Charging Instructions and Battery Care

In order to fully maximize your experience with the Smartcell Replenish/Replenish XT battery, please follow the steps below:

- 1 **Power off your device, remove the existing battery, and insert the Smartcell Replenish/Replenish XT battery.**
 - a.) Be sure to align the battery contacts to the appropriate terminals.
- 2 **Power on your device, connect your stock power adapter to your device, and charge the Smartcell Replenish/Replenish XT battery for 8-12 hours.**
 - a.) After a full charge, use your device normally until you reach a 10-15% charge level.

3 Repeat this 8-12 hour charge cycle 5 times.

- a.) The software in your device needs to recognize the capacity change with the battery and also to rewrite battery statistics. This is especially important with the Smartcell Replenish XT series. Repeating the cycle 5 times ensures that your device has been calibrated with the battery.
- b.) Please be sure to follow this procedure. You will enjoy optimal battery performance after 5 charge/discharge cycles.

Note: Please avoid fully discharging the battery at all times, as this reduces your battery's life span. For best results, charge your battery when your device indicates a charge remaining of 10-15%.

Contact Us

Thank you once again for purchasing Smartcell products. If you have any questions or comments about our items, please email support@smartcellgear.com.

If you purchased your item from one of our authorized dealers, please contact the retailer from which you bought your product from to initiate a return/replacement.
